

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Commercial Handbooks. 383 pp. Index. W. & R. Chambers, Ltd., London, 1913. 2s. 6d. 7 x 5.

LA GEOGRAFIA NELLA III CLASSE ELEMENTARE. La Provincia di Bologna. Di M. Longhena. 39 pp. Maps. N. Zanichelli, Bologna, 1911. L. 1. 9 x 6½.

NEW MAPS

EDITED BY THE ASSISTANT EDITOR

For system of listing maps see p. 74 of this volume

SOUTH AMERICA

Argentina-Chile. Mittel Argentinien und Mittel Chile zwischen 26. und 35. Grad südl. Br. nach den neuesten Quellen bearbeitet, herausgegeben von Prof. Dr. R. Jannasch. Ausgabe 1912. 1:1,000,000. 26°-35° S.; 72¼°-55½°. 4 colors. In 4 sheets. Engraved by Lith. Anst. v. Leopold Kraatz, Berlin. Price M. 30.

[Valuable map on a relatively large scale based on all of the sources available. Relief is in brown shading, drainage in blue. Railroads, in operation and projected, and roads, main and secondary, are shown. There are six symbols for towns and other settlements; why their explanation is in Portuguese, while the rest of the legend, as is to be expected, is in Spanish, does not appear. The boundaries of many land grants and *colonias* are shown. The choice of the millionth scale is a felicitous one, as, for this economically so important region of South America, the map thus anticipates, in a way, the publication of the relevant sheets of the International Map of the World, some of which, to be sure, have already been issued, in a preliminary edition at least, within the area covered by the map, viz.: South H 19, I 18 and 19, for Chile, and G, H and I 21 for Argentina.]

AFRICA

Sahara. Der Stand der Erforschung der Libyschen Wüste und Tibestis, Anfang 1914. Entworfen von Ewald Banse. 1:7,500,000. 32°-14° N.;
